Overview

For the August 2018 Release of MyNavy Portal (MNP), efforts have been focused on data interfaces and systems integration, which are foundational to capabilities that will be available to Sailors with the launch of MyNavy Career Center (MNCC), scheduled for September 2018.

What is MyNavy Portal?

The Navy began a Beta test of MNP on February 17, 2017, to make it easier for Sailors to manage their careers from the day they join until the day they retire or separate. The overarching goal for MNP is to provide Sailors a secure, reliable, self-service portal that makes it easy to complete all Manpower, Personnel, Training, and Education (MPT&E) business. Although MNP is currently in the Beta testing phase, the portal is live and displays real data. Sailors use about 60 different systems to manage their careers. Right now, MNP includes links to those systems, but over time many of those systems will be incorporated into MNP.

MNP is accessible to all Sailors via login with a common access card. To log in, visit: my.navy.mil and select Login, then choose either Low Bandwidth Mode or High Bandwidth Mode. For Sailors afloat or ashore in areas with limited bandwidth, choosing Low Bandwidth Mode removes all photos, graphics, and formatting found on the High Bandwidth Mode version of MNP in order to minimize the time it takes for each page to load in a browser. The low bandwidth version of MNP loads faster, performs more smoothly, and allows Sailors the ability to quickly complete Navy career tasks in MNP.

What is MyNavy Career Center?

MNCC is a significant undertaking designed to support the Navy’s transformation of pay and personnel services. The first iteration will be available in September 2018, with upgrades to Sailor self-service capabilities and other features.

The concept for MNCC is based on a model comprised of MyNavy Portal, a contact center, and three transactional support centers that will enhance delivery of personnel and pay (or human resources) services.

Benefits of MNP

The incremental release of MNP began in early 2017 and includes quarterly software updates. When development on MNP is completed, the high-level benefits to Sailors will include:

- Integrated “one-stop shop” to manage and view personnel and career information.
- Self-service, web-enabled applications and streamlined business processes for increased operational effectiveness and productivity.
- Personalized access and content targeted to user role and job function, making work more efficient.

Top 10 Things to Know About MyNavy Portal

- MNP is a response to Sailors’ consistent feedback that there are too many personnel and training systems they must access and their data is not shared across these systems.
- MNP provides a “front door” to most of the Navy and DoD systems that Sailors access throughout their careers to fulfill MPT&E requirements.
- MNP creates efficiencies for Navy HR services that are time-consuming, manpower-heavy, and involve numerous legacy IT systems.
- MNP organizes personnel, training, and education resources into Career & Life Event categories that include tasks Sailors must complete throughout their careers.
- Fleet Sailors and Navy subject matter experts provide inputs to requirements and design activities to ensure MNP capabilities align Navy business and user needs into a single system supporting Sailor self-service.
- MNP continues to mature and evolve as new capabilities are developed, tested, and released quarterly, based on Sailor and MPT&E Transformation priorities.
- For the June 2018 release, the software platform used to build MNP was upgraded to a new version (Liferay DXP). This resulted in faster page loading, other significant performance enhancements across the portal, and allowed for a complete redesign of every page in MNP for a clean, modern look.
- The June 2018 release included the ability to fill out and submit a Physical Activity Risk Factor Questionnaire (PARFQ).
- MNP February 2017 Beta Release consolidated the Navy Knowledge Online (NKO) capability (including links to Navy eLearning and the Electronic Training Jacket), as well as some functions in the Navy Standard Integrated Personnel System, Electronic Service Record and BUPERS Online.
- MNP officially replaced NKO, which was shut down in April 2017.

Sailor Feedback Needed!

MNP is being built by Sailors, for Sailors, and we want your feedback!

The MNP team reviews all feedback in an ongoing effort to ensure the portal meets the needs of Sailors. Numerous improvements have already been made based on Sailor feedback. Please let us know how we can improve MNP for the benefit of all Sailors.

Please use the built-in feedback mechanisms to submit your suggestions, comments or notice of broken links to the MNP team. Click the Page Feedback button (located at the bottom right of any page in MNP) to open a form for submitting your page-specific feedback. You can also visit the MNP Feedback section on the MNP main menu to share your constructive suggestions on how the overall experience can be improved.
