Senior Medical Officer

Corps Staff
The 7 Elements of IMR

1. Periodic Health Assessment (PHA)
2. eDHA complete and certified
3. Deployment Limiting Conditions
4. Immunizations
5. Dental Readiness
6. Readiness Laboratory Studies
7. Individual Medical Equipment (hearing aides, glasses, etc)
Prior to arrival ALL LABS are researched in the NAVY’S Medical Databases (AHLTA/MRRS/HR).

If Labs are not found in the HR, MMRS, or ALTHA then SM will be scheduled for the required Labs.
Immunizations

- Prior to arrival ALL IMMs are researched in the NAVY’S Medical Databases (MRRS/HR). ALTHA search is done during the Medical Requirements window on the schedule.

- If IMMs are not found in the HR or the Databases, then SM will be scheduled to receive the Immunizations.

- Small Pox is not given during the medical requirements schedule time. SP will be administered along with any live virus IMMZ after the provider visit.
Pre-Deployment Considerations

• **Deployment limiting conditions entered in MRRS**

• **Disorders not meeting the threshold for a MEB (Medical Evaluation Board) should demonstrate a pattern of stability without significant symptoms for at least 3 months prior to deployment.**

• **Ensure all labs, x-rays etc. are resulted prior to “deployable”**

• **PHA and eDHA processes provide opportunity to identify conditions and concerns that would stop a service member from meeting Pre-deployment medical criteria.**

• **Pre-deployment Health Assessment is designed to identify health concerns that would preclude deployment or require a brief course of treatment immediately prior to deployment.**
Medical Process
