

Communications Exercise Support

SSC Pacific has developed a team of subject matter experts (SMEs) to assist entities in communications focused exercise development and execution.

Background

Exercises are an important tool to train for and practice mitigation, prevention, response, and recovery capabilities in a risk-free environment. Often, however, a key Target Capability (i.e. Communications) is either omitted from or only notionally included in exercise opportunities. To best approximate the true operational environment, exercises should thoroughly incorporate and evaluate available communications procedures, tools, and personnel into each multi-agency, multi-discipline, multi-jurisdictional training/ testing opportunity.

The Technology

A team of exercise and communications subject matter experts (SMEs) to assist urban areas, regions, states, territories, and federal departments/agencies/organizations with:

- Designing, conducting, and evaluating HSEEP-compliant, communications-focused public safety/service discussion-based and functional exercises
- Evaluating communications capabilities at full scale exercises
- Developing communications-specific exercise injects
- Supporting special event communications pre-planning
- Performing on-site assessments of communications-related operational procedures

Key Areas of Support

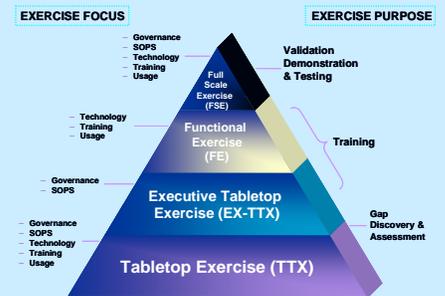

- Communications-focused Tabletop Exercise
- Communications-focused Executive Tabletop Exercise
- Communications-focused Functional Exercise
- Full Scale Exercise
- Special Event/Pre-Event Planning Support
- Operational Communications Assessments
- Training and Exercise Planning Support

Deliverables Include (Varies)

- Exercise Presentations and Briefings
- Initial, Mid-Term, and Final Planning Conference participation
- Communications Exercise Evaluation Guidelines
- Logistics Package
- Exercise & Situation Manuals
- After Action Report/Improvement Plan
- Master Event Scenario Listing (MSEL)

Tabletop Exercise

Exercise Hierarchy

Full Scale Exercise

Approved for public release; distribution is unlimited.
