

## USS TRUXTON (DDG 103)

Guided Missile Destroyer  
Homeport: Norfolk, Virginia

Technological advances have improved the capability of modern destroyers culminating in the Arleigh Burke class. Named for the Navy's most famous destroyer squadron combat commander and three-time Chief of Naval Operations, THE SULLIVANS was the most powerful surface combatant ever put to sea. Like the larger Ticonderoga class cruisers, DDG 51's combat systems center around the Aegis combat system and the SPY-ID, multi-function phased array radar. The combination of Aegis, the Vertical Launching System, and advanced anti-submarine warfare system, advanced anti-aircraft missiles and Tomahawk ASM/LAM, the Burke class continues the revolution at sea.

Designed for survivability, DDG 51's incorporates all-steel construction and many damage control features resulting from lessons learned during the Falkland Islands War and from the accidental attack on USS Stark. Like most modern U.S. surface combatants, DDG 68 utilizes gas turbine propulsion. These ships replaced the older Charles F. Adams and Farragut-class guided missile destroyers.

### SHIP'S SPECIFICATIONS:

#### GENERAL

Length - 510 feet  
Beam (Maximum)- 66 feet  
Speed:  
Draft (Navigational)- 22 feet  
Displacement- 9200 tons  
Complement 32 Officer/348 Enlisted

#### SENSORS

SPY-ID

#### WEAPONS

Tomahawk ASM/LAM  
Advanced anti-aircraft missiles

#### AIRCRAFT

#### ENGINEERING

Propulsion: Gas Turbine Engines, 2 propellers  
Electrical:  
Services:
