1. **Policy**

   a. When processing includes
      
      (1) any court-martial conviction;

      (2) a civilian conviction, or finding tantamount to a finding of guilty by a civil court system; or

      (3) an approved diagnosis of a medical officer;

   the board may not render its own findings because these matters have already been judicially/medically determined to have occurred.

   b. Unless there are additional reasons for separation, the board will proceed directly to the separation/retention recommendation phase of the hearing.

   c. The only exception is civil conviction from a foreign nation, which is not binding on administrative boards.
