Tidewater Association of Service Contractors
Industry Outreach Initiative
11 October 2018

Ms. Robin Rourk
Deputy Director for Small Business Programs,
Office of Small Business Programs (OSBP)
Cybersecurity Requirements

▼ Cybersecurity – What Small Businesses Need to Know

- Implementing DFARS Clause 252.204-7012 (Safeguarding Covered Defense Information and Cyber Incident Report)

DFARS Clause 252.204-7012 requires DoD contractors, including small businesses, to:

1. Provide adequate security to safeguard covered defense information that resides in or transits through their internal unclassified information systems from unauthorized access and disclosure.
3. When contractors or subcontractors discover and isolate malicious software in connection with a reported cyber incident, submit the malicious software to DoD Cyber Crime Center (DC3) in accordance with instructions provided by DC3 or the Contracting Officer.
4. Preserve and protect images of all known affected information systems identified and all relevant monitoring/packet capture data for at least 90 days from the submission of the cyber incident report to allow DoD to request the media or decline interest.

Statement A: Approved for Public Release. Distribution is unlimited (9 October 2018).
Category Management

Category management is a strategic business practice that the Federal government is implementing to buy smarter and more like a single enterprise.

The goals of government-wide category management are to:
1) Deliver more savings, value, and efficiency for Federal agencies;
2) Eliminate unnecessary contract redundancies; and
3) Meet the government's small business goals.

Best-in-class (BIC) is a government-wide designation for acquisition solutions that can be used by multiple agencies and that satisfy key criteria defined by the White House Office of Management and Budget. This page consolidates BIC Program-related articles and solutions posted in the Acquisition Gateway.

Subcontracting

SubNet: The Small Business Administration’s (SBA) Subcontracting Network System for all federal government subcontracting opportunities

- Purpose is to be the centralized system that SBs utilize to identify federal government subcontracting opportunities
- New Features rolled out March 2018
  - Tools will allow ability to upload documents and post solicitations and streamline searches

Statement A: Approved for Public Release. Distribution is unlimited (9 October 2018).

▼ Similarly Situated Entities (SSE)

- Requires a small business or socioeconomic status set aside awarded to keep or perform at least 50% of the work. It allows SSEs to enter teaming agreements and perform federal contracts which are set aside for their particular socioeconomic status/sse status without triggering the 50% performance or limitation on subcontracting rule.
  - Ex – 4 WOSB can team on a WOSB even though the prime WOSB subcontracts more than 50% of the work to other than WOSBs.
  - Ex – A HUBZone can win a HUBZone set aside and then subcontract 75% of the work to another HUBZone.

Current status: In Office of Information and Regulatory Affairs (OIRA) with the rest of the FAR cases under the backlog from the 2 for 1 regulatory reduction policy.

Statement A: Approved for Public Release. Distribution is unlimited (9 October 2018).
