Contracts Leadership Guidance

Focus Areas
(Naval Force the Nation Needs)
1. Deliver and Sustain Lethal Capacity
2. Increase Agility
3. Drive Affordability
4. Build Workforce to Compete & Win

4Ds
(How We’re Getting There)
1. Decentralize (to the lowest level)
2. Differentiate (the work)
3. Digitize (all facets of work)
4. Develop (the Workforce)

“How we acquire systems out here should not necessarily be exactly how we acquire a new ship, airplane or [piece of] gear ... we trick ourselves into this 'one size fits all' model. We need to differentiate.”
ASN RDA James “Hondo” Geurts speaking to NAVWAR workforce Feb. 2018
Full Story: https://www.navy.mil/submit/display.asp?story_id=104349

We are a microcosm of what Big Navy is trying to do.
We are moving in the direction they are setting.

CIC Meeting Leadership Expectations

CXO Tech Forum on Acquisition Innovation

“[We] can’t just do what we’ve always done, faster. Are we burning calories on things that make a difference? Working with industry on acquisition is essential because “it’s best to grab a better idea that’s out there than to try and create the idea ourselves.””
ASN RDA James “Hondo” Geurts

Introducing speed into the Navy’s acquisition process

“…If somebody else is doing it, whether it’s in commercial industry or somewhere else, take it and run.” …“I get all of the PEOs, commanders and direct reports once a month. At the beginning of that session is sharing what I call rapid learning moments. Some are successes some are things where we’ve learned that we don’t want to do it this way, we’ll do it a different way. That way, everybody is building on each other. We’re not each individually innovating from the patient zero perspective.”
ASN RDA James “Hondo” Geurts
