

PEO C4I STRATEGY 2018-2025

VISION

Acquire and field advanced capabilities to revolutionize digital warfare

MISSION

Accelerated delivery of **required** capability that is **affordable, integrated** and **interoperable**

GOALS

1

Deliver by 2025 an IW platform that enables strategic, operational and tactical effects: "ODIN"

- Define an Information Warfare (IW) end state and develop a strategy to get there
- Design and deliver the Information Warfare Platform (IWP) 1.0, ODIN, that enables strategic, operational and tactical effects.
- Employ short and long term training strategies to improve the effectiveness and efficiency of C4I capability based training solutions

2

Accelerate delivery of integrated capability through intentional design and modernization of systems and processes

- Define and demonstrate a repeatable and rigorous DevOps process to enable rapid software development, test, integration, and deployment.
- Design capabilities for installability to reduce the cost and timeline of installations
- Accelerate science and technology into programs to insert the most effective technology available into PEO C4I capabilities
- Streamline processes to ensure capabilities are acquired, developed, tested and fielded efficiently and effectively

3

Foster an environment that enables our workforce to realize their greatest potential and deliver integrated capabilities to the warfighter

- Create better understanding in workforce on how capabilities are used operationally and across PEO C4I
- Assess the organizational constructs that inhibit the workforce's ability to deliver integrated capability
- Implement consistent project management best practices that realize effective cost, schedule, performance and risk
