Annex D: Master Course Schedule ..................................... D-1
Annex E: Instructional Management Plan ............................ E-1
Annex F: Stretching Exercises ........................................ F-1
FOREWORD

This document was prepared for submission to higher authority for approval. The curriculum outline lists course lesson topics and associated learning objectives, both terminal and enabling, in their sequential order. Unless otherwise stated, the standard for achieving each of these objectives is 100%.

In Annex A, prices of some equipment have not been listed because in most cases the equipment is obtained from Defense Reutilization and Marketing activities.

In Annex D of the Curriculum Outline a master course schedule appears for water survival training. The schedule lists the lesson topic numbers that are to be used to teach the appropriate course of training.
1. **Course Title:** Intermediate Water Survival Training Program

2. **Course Identification Number (CIN):** Q-050-0605

3. **Course Data Processing Code (CDP) by Site:** Pensacola FL

4. **CDP Code:** 0212H

5. **Course Status:** Revision.

6. **Course Mission Statement:** The Intermediate Water Survival Training Program develops personal water survival skills. Intermediate water survival training shall include "hands-on" training which exposes students to the various survival skills needed in an open sea survival environment. Training also prepares students to continue on with N1 training. Instructors shall strive to develop student's confidence in their equipment and their ability to survive. Standardized instruction and strict compliance with existing guidelines issued in this curriculum are the key factors in determining the success of training. The water survival site's Officer in Charge shall ensure that current requirements are clearly understood by staff and students. The Model Manager shall monitor training through periodic evaluations of each training site.

   In addition, all instructional personnel shall create a positive, professional attitude towards Intermediate Water Survival training while building awareness of its value. Student convenience should be emphasized. This is accomplished through administrative services designed to accommodate ease of check-in/out and facilitate training efficiency. Instructors must make every effort to create an environment conducive to learning vice testing.

7. **Occupational Classification:** None.

8. **Prerequisites:** None.

9. **Planned Course Length:** 10 days

10. **Current Course Length:** 10 days

11. **Training Site:**

    Naval Aviation Schools Command
    181 Chambers Ave Suite C
    Pensacola Fl 32508-5221

12. **Site Unique Training Consideration:** See page E-3.

16. Instructor/Support Manning:  

a. Basic Swimming and Water Survival Instructor (9510 NEC or Officer equivalent) (graduate of CIN A-012-1014)  
b. Certified by the Model Manager to conduct this course.  
c. Qualified lifeguard per BUPERINST 1710.19  
d. Comply with any other site specific manpower requirements.
1. **Personnel Physical Requirements:**

   a. Prospective and designated aircrew shall report with a current Aeromedical Clearance Notice (NAVMED 6410/2) signed by a U.S. Navy flight surgeon, aviation medical officer, or aviation medical examiner.

   b. Naval aviator and enlisted aircrew candidates entering initial aviation training at the Naval Aviation Schools Command, shall:

      (1) For cases where NAVAEROSPMEDINST has completed a flight physical but cannot issue an Aeromedical Clearance Notice (NAVMED 6410/2) pending administrative processing, NAVAEROSPMEDINST may certify the candidate physically qualified to commence initial training utilizing NAVAEROSPMEDINST Form 6120/2.

      (2) Naval aviator candidates shall not be transferred from Naval Aviation Schools Command to further aviation training until NAVAEROSPMEDINST completes the flight physical and an Aeromedical Clearance Notice (NAVMED 6410/2) has been issued.

2. **Security Clearance:** None.

3. **Obligated Service:** None.

4. **NOBC/NEC Earned:** None.
UNIT 1.0: Intermediate Water Survival Training Program (IWSTP) Overview/Course Introduction

Contact Periods: 1.5 Classroom, 3.5 Laboratory

Media: Lecture with audiovisual aids

Security Classification: Unclassified

Terminal Objective:

Completely supported by this unit:

1.0 Upon completion of this unit of instruction, the student will identify requirements for water survival training and will state the DOR/TTO policies and the safety precautions used during training.

Partially supported by this unit:

2.0 Upon completion of this unit of instruction, the student shall demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing, perform survival swim strokes, abandon ship drill, confidence endurance swim, treading water, and survival floating without injury to personnel or damage to equipment.
Lesson Topic 1.1  IWSTP Overview/Course Introduction/Swim
Familiarization

Contact Periods:  1.5 Classroom, 3.5 Laboratory
Media:  Lecture with audiovisual aids

Terminal Objective:

Completely supported by this lesson topic:

1.0 Upon completion of this unit of instruction, the student will identify requirements for water survival training and will state the DOR/TTO policies and the safety precautions used during training.

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction, the student shall demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing, perform survival swim strokes, abandon ship drill, confidence endurance swim, treading water, and survival floating without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

1.1 Identify requirements for water survival training.
1.2 Identify and adhere to all safety precautions used during training.
1.3 Identify and adhere to the training schedule and remedial opportunities.
1.4 State the DOR/TTO policies and procedures.
2.1 State the purpose, advantages and disadvantages of the survival Breaststroke, Sidestroke, Elementary backstroke, and American crawl.
2.2 Perform 50-yard swim in bathing suit.
2.3 Practice survival swim strokes while wearing bathing suits.
UNIT 2.0: Survival Swimming

Contact Periods: .5 Classroom, 17.5 Laboratory

Media: Lecture with audiovisual aids

Security Classification: Unclassified

Terminal Objective:

Partially supported by this unit:

2.0 Upon completion of this unit of instruction, the student shall demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing, perform survival swim strokes, abandon ship drill, confidence endurance swim, treading water, and survival floating without injury to personnel or damage to equipment.
Lesson Topic 2.1: Introduction to Survival Swimming and Swim Screen

Contact Periods: 2.5 Laboratory

Media: Lecture with visual aids

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction, the student shall demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing perform survival swim strokes, abandon ship drill, confidence endurance swim, treading water and survival floating without injury to personnel or damage to equipment.

Enabling Objective:

Completely supported by this lesson topic:

2.4 Step from a tower not to exceed 15 feet and swim 100 yards demonstrating 25 yards each of Breaststroke, Sidestroke, Elementary Backstroke, and American Crawl. Remain afloat for 1 minute using a prone face down technique.
Lesson Topic 2.2: Survival Floating/Treading Water/Swimming in Organizational Clothing. (Laboratory 1, 2, & 3)

Contact Periods: .5 Classroom, 6.0 Laboratory

Media: Lecture with visual aids

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction, the student shall demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing, perform survival swim strokes, abandon ship drill, confidence endurance swim, treading water, and survival floating, without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

2.5 Perform survival floating and treading water skills while wearing a bathing suit.

2.6 Perform survival floating and treading water while wearing organizational clothing and boots.

2.7 Perform survival floating and treading water skills while wearing organizational clothing, boots, gloves and personal flotation device (PFD).

2.8 Perform the survival breaststroke, sidestroke, and elementary backstroke while wearing organizational clothing and boots.

2.9 Perform the survival breaststroke, sidestroke, and elementary backstroke, while wearing organizational clothing, boots, gloves, and PFD.
Lesson Topic 2.3: Survival Floating/Treading Water Test/Surface Debris/Burning Oil/Fuel, Swim

Contact Periods: 2.5 Laboratory

Media: Lecture with visual aids

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction, the student shall demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing, perform survival swim strokes, abandon ship drill, confidence endurance swim, treading water, and survival floating techniques, without injury to personnel or damage to equipment.

Enabling Objectives:

Partially supported by this lesson topic:

2.10 Perform the treading water and survival floatation test while wearing organizational clothing.

Completely supported by this lesson topic:

2.11 Perform the survival breaststroke, sidestroke, and elementary backstroke while wearing organizational clothing, boots, gloves, PFD and helmet.

2.12 Perform the Surface Debris and Surface Burning Oil Swimming techniques in the training pool while wearing organizational clothing, boots, PFD, and gloves.
Lesson Topic 2.4: Abandon Ship Procedures/Submerged Burning Oil Swim/Rough Water Swim/Trouser Inflation

Contact Periods: 2.5 Laboratory

Media: Lecture with visual aids

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction, the student shall demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing, perform survival swim strokes, abandon ship drill, confidence endurance swim, treading water, and survival floating techniques, without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

2.13 Step off a tower not to exceed 15' and swim 15 yards underwater while wearing bathing suit.

Partially supported by this lesson topic:

2.14 Step off a tower not to exceed 15' and swim 15 yards underwater while wearing organizational clothing and boots.

Completely supported by this lesson topic:

2.15 Perform the submerged burning oil swim while wearing organizational clothing and boots.

2.16 Perform the four methods of inflating trousers while in the deep end of the training pool.

2.17 Perform rough water swim in the training pool while wearing a bathing suit.
Lesson Topic 2.5: Survival Swimming Out Test

Contact Periods: 2.0 Laboratory

Media: Lecture with visual aids

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction, the student will demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing, perform survival swim strokes, abandon ship drill, confidence an endurance swim, treading water, and survival floating techniques, without injury to personnel or damage to equipment.

Enabling Objectives:

Partially supported by this lesson topic:

2.10 Perform the treading water and survival flotation test while wearing full organizational clothing/equipment.

2.14 Step off tower not to exceed 15' and swim 15 yards underwater while wearing organizational clothing and boots.

Completely supported by this lesson topic:

2.18 Swim 200 yards continuously demonstrating the breaststroke, sidestroke, elementary backstroke and American crawl stroke (50 yards each) while wearing a bathing suit.

2.19 Perform the 75-yard organizational clothing swim while wearing full organization clothing/equipment utilizing the survival breaststroke, sidestroke, and elementary backstroke.
Lesson Topic 2.6: Survival Swimming Confidence and Endurance Test

Contact Periods: 2.0 Laboratory

Media: Lecture with visual aids

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction, the student will demonstrate knowledge of survival swimming techniques, and while wearing organizational clothing without shoes, perform survival swim strokes, abandon ship drill, confidence an endurance swim, treading water, and survival floating techniques, without injury to personnel or damage to equipment.

Enabling Objective:

Completely supported by this lesson topic:

2.20 Swim approximately one mile in a swimming pool in 80 minutes or less, while wearing organizational clothing, without touching the bottom or sides or ends of the pool.
UNIT 3.0: American Red Cross (ARC) Standard First Aid Course

Contact Periods: 6.5 Classroom

Media: Lecture with Instructor Demonstration

Security Classification: Unclassified

Terminal Objective:

Completely supported by this unit:

3.0 Upon completion of this unit of instruction, the student will be certified in American Red Cross Standard First Aid.
CURRICULUM OUTLINE OF INSTRUCTION

Lesson Topic 3.1: American Red Cross Standard First Aid Course

Contact Periods: 6.5 Classroom

Media: Video tape and instructor lecture

Terminal Objective:

Completely supported by this lesson topic:

3.0 Upon completion of this unit of instruction, the student will be certified in American Red Cross Standard First Aid.

Enabling Objectives:

Completely supported by this lesson topic:

3.1 Perform adult, Cardiopulmonary Resuscitation (CPR) per current American Red Cross Adult CPR course.

3.2 Treat injuries per current American Red Cross Standard First Aid course.
COURSE TRAINING TASK LIST (CTTL)

INTERMEDIATE WATER SURVIVAL TRAINING PROGRAM

Q-050-0605

Course Mission Statement

The Naval Water Survival Training Program develops personal water survival skills. Naval water survival training shall include “hands-on” training which exposes students to the various survival skills needed in an open sea survival environment. Training will also prepare students to continue on with N1 training. Instructors shall strive to develop student’s confidence in their equipment and their ability to survive. Standardized instruction and strict compliance with existing guidelines issued in this curriculum are the key factors in determining the success of training. The water survival site’s Officer in Charge shall ensure that current requirements are clearly understood by staff and students. The Model Manager shall monitor training through periodic evaluations of each training site.

In addition, all instructional personnel shall create a positive, professional attitude towards naval water survival training while building awareness of its value. Student convenience should be emphasized. This is accomplished through administrative services designed to accommodate ease of check-in/out and facilitate training efficiency. Instructors must make every effort to create an environment conducive to learning vice testing.

STATE the purpose, advantages, and disadvantages of the survival strokes.

PERFORM 50 yard swim screen.

PRACTICE survival swim strokes.

COMPLETE 100 yd swim screen utilizing the breast stroke, sidestroke, elementary backstroke and american crawl.

PERFORM survival floating and treading skills in bathing suit.

PERFORM survival floating and treading water skills while wearing a flight suit and boots.

PERFORM survival floating and treading water skills while wearing a flight suit, boots, gloves and the SV-2/LPU.

PERFORM the survival breast stroke, sidestroke, and elementary backstroke while wearing flight suit and boots.

PERFORM the survival breast stroke, sidestroke and elementary backstroke while wearing a flight suit boots, gloves, and SV-2/LPU.

PERFORM two minutes of treading water followed by three minutes of survival floating while wearing flight suit, boots, helmet, gloves and Sv-2/LPU.
PERFORM flight equipment swim  S
practice in full gear.

PERFORM the surface debris S
swim while wearing flight suit, boots, life preserve and gloves.

PERFORM surface burning oil S
swim while wearing flight suit, boots, life preserver, and gloves.

PRACTICE swimming in coveralls S or flight suit.

PERFORM abandon ship drill S
procedures.

PERFORM 200 yd swim screen S
utilizing 50 yd of breast stroke, sidestroke, elementary backstroke and american crawl stroke.

PERFORM the 75 yard flight S
equipment swim while wearing full flight gear utilizing the survival breast stroke, sidestroke and elementary backstroke.

PERFORM survival swimming S
confidence and endurance test.

MASTER COURSE SCHEDULE

This annex contains the Master Course Schedules for the Intermediate Water Survival Training Course, which is the ideal schedule of IWSTP students. The training site may change this schedule as long as changes do not alter the sequential order of the lesson plans. Students shall not be scheduled for longer than 4 hours of laboratory at one time. Changes must be approved by the Division Officer.

ANNEX E
INSTRUCTIONAL MANAGEMENT PLAN

Course Management Data

1. Staff Requirements:

   General:
   
   a. A designated instructor should be in close enough proximity to see and hear the students at all times during the course of instruction of a high risk training evolution.
   
   b. A minimum of one qualified Basic Water Survival Instructor (BWSI) is needed to conduct a lecture.
   
   c. Only a qualified BWSI, or a Training Assistant under the supervision of a BWSI, is allowed to coach students in the shallow end of the pool.
   
   (4) When a BWSI Instructor Under Training is teaching high risk segments of the course, a designated BWSI shall be in close enough proximity to see and hear the training evolution.

   NOTE: See Site Augment Plan, page E-3, for manpower requirements.

2. Facilities Requirements

   a. Classrooms must have temperature controls, adequate lighting for note taking, and seating capability for 60 students.

   b. Training Pool Requirements:

   (1) Markings. Swimming pools shall be marked in accordance with Section 4-8, Chapter 4, of the Manual Of Naval Preventive Medicine.

   (2) Pool water. Pool water shall be maintained in accordance with Sections 4-9 and 4-11, Chapter 4, of the Manual Of Naval Preventive Medicine. Pool temperature will be maintained between temperatures of 78-88 degrees Fahrenheit. A variance of 2 degrees Fahrenheit above this does not require termination of training, but should not stay at that temperature for more than two days.

   (3) Shower and Restrooms. Shower and restrooms areas will be maintained in accordance with Section 4-8, Chapter 4, of the Manual of Naval Preventive Medicine

   (4) A well-ventilated space must be provided to store and dry wet training gear.

Equipment Requirements. In addition to the prescribed equipment identified in Annex B the following equipment conditions are required:

   a. Pools must have a fixed or portable audible alarm to signal pool evacuation. A whistle or air horn is sufficient. Students shall be briefed on the signal and what action to take.
b. A portable emergency medical oxygen system, capable of delivering a continuous flow of oxygen shall be poolside ready for immediate use and shall be inspected prior to each training session. Commanding officers of training activities will ensure that oxygen system and Poolside Supplemental Oxygen Training Program is in compliance with the CNET Instruction.

c. The following equipment shall be pool side, ready for immediate use and shall be inspected prior to each training session:

1. U.S. Coast Guard approved ring buoys with manila or polypropylene retrieving lines. Retrieving lines shall be 1/4" diameter and approximately 50 feet in length.

2. American Red Cross approved rescue tubes, for safety swimmer use. (Torpedo buoys may be substituted).

3. A fully equipped backboard with head immobilizer and a minimum of three straps for the victim's chest, hips, and thighs.

5. A telephone shall be immediately accessible with emergency numbers posted nearby.

6. Ear wash (to prevent ear infection) shall be available. An acceptable solution is 2% acetic acid, 3% distilled water and 95% isopropyl alcohol.

d. Required Personal safety equipment:

1. Safety Observer: Ring buoy and whistle
2. Safety Swimmer: Mask, fins, and rescue tube/torpedo buoy
3. Training Assistant: Ring buoy and whistle
4. Primary Instructor: Ring buoy and whistle

4. Alternate Training Plan

Students must complete all course objectives in order to graduate. Students must receive all lesson plan presentations. If a laboratory application must be cancelled (due to inclement weather, equipment malfunctions, etc.), students must complete the Alternate Training Plan as specified in the lesson plan. The model manager may waive certain events if factors (e.g. weather, medical) preclude the students from participating, the course objectives have been met, there is no Alternate Training Plan, and every effort has been made to complete the evolution. Missed training elements shall be annotated as incomplete in individual training jackets.
Site Augment Plan

Specific for Naval Aviation Schools Command, Pensacola FL and Vance Air Force Base, Enid, OK:

a. Lesson plans 1.1, 2.1, 2.2, 2.4, (pool labs):

The following minimum staff will be assigned regardless of class size:

1 qualified BWSI
1 Training assistant
1 Safety Swimmer
*1 Safety Observer

b. Lesson Plans 2.3, 2.4, 2.5:

The following minimum staff will be assigned regardless of class size:

1 qualified BWSI
1 Training assistant
1 Safety Swimmer
1 Safety Observer

c. Lesson Plan 2.6:

1 qualified BWSI instructor
* 1 qualified Training Assistant
1 qualified counter (must be safety observer qualified) for a maximum of 10 students
1 qualified safety swimmer for each 15x25 yard swimming area

* If two pools are used simultaneously to conduct L.P. 2.6, the training assistant will position him/her self on the catwalk between both pools

d. Lesson Plan 3.1

Instructors will adhere to student to instructor and student to manikin ratio identified in the Red Cross instructors' manual. In all cases assistants must be certified in accordance with the Red Cross.

e. Specific for Naval Education Training Security Assistance Field Activity, Pensacola, FL.

(1) In-water Training Evolutions. For in-water training evolutions, the following staff shall be on the pool deck:

(a) 1-10 students: One NAWSTI or BWSI, and one U.S. Navy Lifeguard.

(b) 11-20 students: One NAWSTI or BWSI, one U.S. Navy Lifeguard, and one Safety Observer.

(c) 21-30 students: One NAWSTI or BWSI, one U.S. Navy Lifeguard, and two Safety Observers.

* No more than 10 students at a time in the deep end.
* Required to have a swimmer in the water during evolutions that have 5 or more students in full organizational clothing.
5. **Training Safety**

a. **General**

(1) Staff will strictly adhere to safety requirements located in the lesson plans.

(2) In all cases possible, students shall be prevented from pushing themselves to extremes by lending assistance before a rescue is required. Instructional staff shall call a training time out, instruct students to grab a ring buoy etc. before a rescue is required.

(3) Once proper techniques are mastered, timed events can be achieved without extreme physical exertion. Staff shall terminate student participation in timed events and tests if the student's safety is in question, the student needs additional coaching, or he/she is expending too much energy to perform the skill.

(4) Anytime a student shows signs of panic, fear, extreme fatigue or lack of confidence, the instructor shall stop training, identify the problem and make a determination whether or not to continue training. Instructors shall be alert for any unusual behavior which indicates a student is experiencing difficulty and shall act immediately to ensure the student's safety.

(5) Hazing, improper or degrading rituals or stress producing activities not specified in the lesson plans are strictly prohibited.

(6) **Student illness/injury.** Any time a student becomes ill or injured, the nearest instructor shall provide immediate assistance. Instructors shall stop the training, notify the department head, and must complete the Personal Injury/Accident Notification form NAVAVS COLSCOM 6310/1.

(7) A designated instructor should be in close enough proximity to see and hear the students at all times during the course of instruction of a high risk training evolution.

b. **Special Safety Precautions**

(1) **Hyperventilation.**

(a) Students participating in underwater activities shall be instructed that hyperventilation (repetitive deep breathing) to achieve underwater swimming endurance can result in shallow water blackout and drowning. Competitive breath holding skills/drills and intentional hyperventilation are prohibited.

(b) All underwater swimming evolutions (testing and training) shall be limited to a maximum distance of 15 yards.

(c) All staff will be alert for and rescue students who appear to be under water longer than is safe during practice or testing of any underwater swimming activity.

(2) During the initial screen test, watch students carefully. Weak swimmers often over-estimate their abilities in desperate attempts to stay with the class. Keep staff alert to watch the deep end carefully.
(3) Do not allow students to swim under the catwalks.

(4) Watch underwater swimming activities carefully to make certain that students don't get disoriented and surface under the catwalks.

6. Safety Management

a. Management procedures will be followed in accordance with CNETINST 1500.20, NA VedTRA 135A, and OPNAVINST 5100.23 and Command Safety Instructions

b. Premishap Plans

   (1) All sites shall have a Pre-Mishap Plan, providing a course of action after a training accident or injury. The site officer shall be responsible for developing a specific plan. The Pre-Mishap Plan must address the following areas and establish procedures integrating the site's unique training capabilities:

   (a) Personnel assignments, responsibilities for accidents and injury management, including reporting and documenting mishaps.
   (b) Student management during emergencies.
   (c) Requesting emergency medical assistance.
   (d) Administration of first aid and oxygen.
   (e) Emergency equipment operation, location and use.
   (f) Transporting victims.

c. Training Time Out and DOR Policy

   (1) Students shall be briefed on the DOR and TTO policy and sign DOR/TTO policy of understanding prior to the start of training.

   (2) Staff members shall have a signed DOR/TTO statement of understanding in their training jackets

   (3) DOR Policy: Students are voluntarily enrolled in the Intermediate Swim Course and may request termination of training. When a student states "I quit" or "DOR", they shall be immediately removed from the training environment and referred to the NWSTP Division Officer for administrative action. When a student terminates training by Dropping on Request, the Water Survival Division Officer shall follow DOR procedures identified in CNETINST 1500.20 series.

   (4) TTO Policy. When a student or instructor is apprehensive about his personal safety or that of others, he shall verbally request or signal a TTO to clarify the situation and receive or provide additional instruction. If a student refuses to participate in the training exercise after additional TTO instruction has been provided, he will be removed from training and referred to the site officer for appropriate administrative processing. To reinforce the initial brief, TTO briefs shall be repeated prior to the start of laboratory phases of high-risk training. TTO signals shall be:

   (a) Crossing the hands in a "T".
(b) Calling "time out", "training time out" or "time".

(c) Moving to the side of the pool, during timed tests, constitutes a training time out.

7. Records Keeping
   a. Class rosters, showing training received, and grades achieved shall be retained for a period of four years.

   b. Water Survival Student Screening Forms shall be maintained for 72 hours after completion of training.

   c. Injury logs, reports and records shall be attached to a copy of the class roster and retained for five years at the site.

   d. Student Critiques shall be routed through the immediate chain of command and retained from site evaluation to site evaluation.

Student Flow Management Data

8. Graduation:
   a. Students must complete all course objectives, lesson plans and laboratories to graduate. Completion will be documented in class rosters located at NASC Survival Department. A copy of the class roster will be forwarded to Naval Operational Medicine Institute (NOMI) prior to N-1 training.

   b. Training Waivers: If a laboratory must be cancelled and cannot be rescheduled for a long period of time due to facility damage, pool water problems, equipment malfunctions, etc., every effort must be made to reschedule the lab, including the use of other swimming pools or facilities. The model manager may waive laboratories if all efforts to reschedule the training have been exhausted. In these situations only the laboratory portion of the lesson plans may be omitted, and the missed training element(s) shall be annotated as incomplete in student's training jacket.

9. Remediation

Training activities shall conduct remedial training for academic and swim failures. Appropriate lesson plans from this curriculum shall be used to assist students.

10. Setback to Another Class

Students experiencing a setback in training for emergency, medical, PRB, or other reasons will be returned to training in the first available follow-on class. Intermediate Swim course instructors who receive a "rollback" student shall be made aware of the reasons for the rollback.

11. Dropped from Training for Academic or Suitability Reasons.

When a student fails to meet the prescribed standards for academic, P.T., survival or officer like qualities (OLQ) as outlined in CNATRAINST 1500.4, that student shall be referred to a PRB.
12. General Training Guidelines

a. Upon check-in, students shall be given either a verbal or printed schedule of events and important administrative information. Welcome aboard packets are encouraged. Student pretests are not required.

b. Students shall receive all required lectures and audiovisual presentations which relate to in-water labs, prior to applicable in-water training.

c. Aviation Preflight Indoctrination and Aircrew Candidate School students shall complete the Intermediate Swim course prior to participation in the BUMED N-1 course.

d. After training completion, students shall be given the opportunity to complete a Critique Form (Annex E of the Instructor Guide).

Instructor Certification Program:

a. Instructors, Training Assistants, Safety Swimmers, Safety Observers etc. will be trained and will maintain qualifications specified in NAVEDTRA 135A, AND CURRENT Job Qualification Requirements (JQR) document.

b. Required qualifications and training of staff members shall be documented in individual training records.

c. At least one member of the staff shall maintain necessary instructor qualifications to keep staff current in Lifeguarding, CPR, First Aid and Oxygen administration.

13. Instructor Screening Guideline

Instructors shall be screened in accordance with CNETINST 1500.20 series or USAF equivalency.
ANNEX F

Stretching Exercises

A. Lead students through the following stretching exercises prior to all in water evolutions.

1. Preparation
   a. Stretch within your limits without straining.
   b. Do not hold your breath while stretching and do not bounce.
   c. There is a difference between the feeling of stretch and pain. When you stretch you should stretch to a point where you are feeling an easy stretch then hold and relax. As you relax and the feeling of the stretch changes to a milder stretch, then stretch a little further until you get the feeling of a good stretch again.
   d. Hold stretches for a minimum of 20 seconds.

2. Types of stretches to perform
   a. **Side to side stretch:**
      Arm straight up and grasp the left wrist with the right hand. Slowly lean to the right without bending forward at the waist. Repeat in the opposite direction.
   b. **Triceps stretch:**
      Touch the left shoulder blade with the left hand and press down on the left elbow with the right hand. Repeat for right arm.
   c. **Posterior shoulder stretch:**
      Stand with feet shoulder with apart. Bring the arm that is to be stretched across the chest. Use the opposite arm to pull the arm being stretched towards the chest until the stretch is felt in the posterior shoulder. Repeat for opposite arm.
   d. **Quadriceps stretch:**
      Standing with left arm on bulkhead for support with right hand reach back and grab right ankle. Then pull ankle up towards buttocks keeping knees together. Repeat for left leg.
   e. **Groin stretch:**
      While sitting with the soles of the feet together and back straight, grasp both feet and pull them as close to the body as possible. Gently pull toes upward, relaxing the musculature of the inner thigh, allowing the weight of the knees to stretch the muscles.
f. **Calf stretch:**
   (1) Stand facing the wall approximately four feet away. Lean against the wall, bring the right leg forward while keeping the left leg extended and left heel flat on the deck.
   (2) After calf stretch, bend the left knee and shift weight forward to stretch achilles tendon.
   (3) Repeat (1) and (2) for the right leg.
   (4) Now stretch with both legs extended, heels flat on the deck.
