This document was prepared for submission to higher authority for approval. The curriculum outline lists course lesson topics and associated learning objectives, both terminal and enabling, in their sequential order. Unless otherwise stated, the standard for achieving each of these objectives is 100%.

In Annex A, prices of some equipment have not been listed because in most cases the equipment can be obtained from Defense Reutilization and Marketing activities.

In Annex D of the Curriculum Outline, a master course schedule appears for water survival training. The schedule lists the lesson topic numbers that are to be used to teach the appropriate course of training. **Students assimilate swimming skills at different rates based on numerous factors.** Because the course is self-paced, it must be realized that some students will be able to master skills quicker than the allotted course time, while others may require more time.
1. **Course Title:** Navy Remedial Swim Training

2. **Course Identification Number (CIN):** A-060-2222

3. **Course Data Processing Code (CDP) by Site:**
   - 5612  Recruit Training Center, Great Lakes, IL
   - 659C  NAVAIVSCOLCOM, Pensacola, FL
   - 9177  Center Surface Combat Systems, San Diego, CA
   - 9378  Officer Training Center, Newport, RI
   - 9379  Center Surface Combat Systems, Norfolk, VA
   - 997S  TRITRAFAC Bangor, WA
   - 997R  Afloat Training Group Mid Pacific, HI
   - 997P  CENEODDIVE DET PAC, HI

4. **CDP Code:** 5612, 659C, 9177, 9378, 9379, 997S, 997R, 997P

5. **Course Status:** Revision

6. **Course Mission Statement:** This course prepares weak or non-swimmers with the basic skills to meet “in test” swim skills to begin numerous Navy programs. It is additionally used to remediate students who are held back from these programs for swim deficiencies. Additional customers are students unable to pass or participate in Navy Swim qualification programs. This course can be used to pass Navy 1st, 2nd, and 3rd class swim tests.

7. **Occupational Classification:** None.

8. **Prerequisites:** Physical/medical prerequisites found on page ix, Student Data.

9. **Planned Course Length:** * 10 days

10. **Current Course Length:** 5 days

   * Students assimilate swimming skills at different rates based on numerous factors. It must be realized that not all students will master skills within the time allotted by the course schedule or they may master skills much quicker than the course schedule dictates.

11. **Training Site:**
    - Recruit Training Center
      3301 Indiana St
      Great Lakes, IL 60088
    - Naval Aviation Schools Command
      181 Chambers Ave Suite C
      Pensacola, FL 32508-5221
    - Center Surface Combat Systems
      3975 Norman Scott Ave
      San Diego, CA 92135-7122
12. **Site Unique Training Consideration:** None.

13. **Number of Convenings by Site:**

16. **Instructor/Support Manning:** See Annex E
1. **Personnel Physical Requirements**: Students must possess a current Navy physical for their occupation as specified in the Manual of the Medical Department and complete a medical screening form at the training activity.

Students participating in this course to remediate for the Intermediate Swim Course will meet physical requirements located in STUDENT DATA page xi of Intermediate Swim CIN Q-050-0605

Personnel from other services and civilians must possess chronological record of Medical Care (SF 600) entry signed by a U.S. Navy physician stating that the individual has been medically screened and no information exists that would preclude that person from participating in swimming activities. Additionally, the student will complete a medical screening form at the training activity.

2. **Security Clearance**: None.

3. **Obligated Service**: None.

4. **NOBC/NEC Earned**: None.
UNIT 1.0 Introduction and Administration

Contact Periods: .5 Classroom

Media: Poolside lecture

Terminal Objective:

Completely supported by this unit:

1.0 Upon completion of this unit of instruction, the student will demonstrate knowledge of course safety requirements.
CURRICULUM OUTLINE OF INSTRUCTION

Lesson Topic 1.1 Remedial Swim Safety
Contact Periods .5 Classroom
Media: Lecture

Terminal Objective:
Completely supported by this unit:

1.0 Upon completion of this unit of instruction, the student will demonstrate knowledge of course safety requirements.

Enabling Objectives:
1.1 Fill out medical screening form.
1.2 Read and sign Training Time Out and Drop On Request forms.
1.3 Attend safety procedures lecture.
UNIT 2.0: Basic Water Familiarity

Contact Periods: 4.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Completely supported by this unit:

2.0 Upon completion of this unit of instruction, the student will perform basic aquatic skills necessary to learn how to swim without injury to personnel or damage to equipment.
Lesson Topic 2.1: Mental and Physical Adjustments to the Water

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction the student will perform basic aquatic skills necessary to learn how to swim without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

2.1 Demonstrate water exploration skills.
Lesson Topic 2.2: Basic Skills

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction the student will perform basic aquatic skills necessary to learn how to swim without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

2.2 Demonstrate basic skills.
Lesson Topic 2.3: Stroke Readiness

Contact Periods 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

2.0 Upon completion of this unit of instruction the student will perform basic aquatic skills necessary to learn how to swim without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

2.3 Demonstrate preparatory survival training skills.
UNIT 3.0: Proper Stroke Mechanics

Contact Periods: 9.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Completely supported by this unit:

3.0 Upon completion of this unit of instruction, the student will perform required survival strokes per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.
Lesson Topic 3.1: Breaststroke

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

3.0 Upon completion of this unit of instruction, the student will perform required survival strokes per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

3.1 Demonstrate the breaststroke.
Lesson Topic 3.2: Sidestroke

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

3.0 Upon completion of this unit of instruction, the student will perform required survival strokes per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

3.2 Demonstrate the sidestroke.
Lesson Topic 3.3: Elementary Backstroke

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

3.0 Upon completion of this unit of instruction, the student will perform required survival strokes per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

3.3 Demonstrate the elementary backstroke.
Lesson Topic 3.4: Crawlstroke

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

3.0 Upon completion of this unit of instruction, the student will perform required survival strokes per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

 Completely supported by this lesson topic:

3.4 Demonstrate the crawlstroke.
CURRICULUM OUTLINE OF INSTRUCTION

Lesson Topic 3.5: Swimming in Organizational Clothing

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

3.0 Upon completion of this unit of instruction, the student will perform required survival strokes per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

3.5 Demonstrate survival swimming in organizational clothing.
Lesson Topic 3.6: Techniques for Long Distance Swimming

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

3.0 Upon completion of this unit of instruction, the student will perform required survival strokes per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

3.6 Demonstrate techniques for swimming long distances.
UNIT 4.0: Basic Water Survival Skills

Contact Periods: 12.0 Laboratory

Media: Lecture, demonstration, and instruction

Terminal Objective:

Completely supported by this unit:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.
Lesson Topic 4.1: Survival Floating

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.1 Demonstrate survival floating.
Lesson Topic 4.2: Treading Water

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.2 Demonstrate treading water.
CURRICULUM OUTLINE OF INSTRUCTION

Lesson Topic 4.3: Transitioning from Treading Water to Survival Floating

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.3 Demonstrate transitioning from treading water to survival floating.
Lesson Topic 4.4: Underwater Swimming

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.4 Demonstrate underwater swimming.
Lesson Topic 4.5: Abandon Ship Drill

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.5 Demonstrate the abandon ship drill.
Lesson Topic 4.6: Rough Water Swimming

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.6 Demonstrate rough water swimming.
Lesson Topic 4.7: Burning Oil and Debris Swimming

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.7 Demonstrate burning oil/debris swimming.
Lesson Topic 4.8: Clothing Inflation

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.8 Demonstrate clothing inflation.
Lesson Topic 2.13: Mask, Fins, and Snorkel Indoctrination

Contact Periods: 1.0 Classroom 1.0 Laboratory

Media: Lecture

Terminal Objective:

Partially supported by this lesson topic:

4.0 Upon completion of this unit, students will demonstrate required survival skills per US Navy Water Survival Instructor's Manual CNETINST P1552/16 without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

4.09 Use mask, fins, and snorkel.

4.10 Don masks, fins, and snorkel.

4.11 Maintain safety swimmer equipment per current 13-1-6 series manual.

4.12 Perform crawl strokes while wearing mask, fins and snorkel.
Unit 5.0: Administering Performance Tests

Contact Periods: 13.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Completely supported by this unit:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.
Lesson Topic 5.1: Third Class Swim Test

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.1 Perform Third Class Swim Test.
Lesson Topic 5.2: Second Class Swim Test

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.2 Perform Second Class Swim Test in accordance with MILPERSMAN.
Lesson Topic 5.3: First Class Swim Test

Contact Periods: 1.5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.3 Perform First Class Swim Test in accordance with MILPERSMAN.
Lesson Topic 5.4: Intermediate Swim Screen

Contact Periods: 1.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.4 Perform Swim Screen per Intermediate Swim Curricula.
Lesson Topic 5.5: Intermediate Swim Out Test

Contact Periods: 1.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.5 Perform Swim Proficiency Test per Intermediate Swim Curricula.
Lesson Topic 5.6: Abandon Ship Drill Test

Contact Periods: 1.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.6 Perform Abandon Ship Drill Test per Intermediate Swim Curricula.
Lesson Topic 5.7: Organizational Clothing/Equipment Swim Test

Contact Periods: 1.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.7 Perform Organizational Clothing/Equipment Swim per Intermediate Swim Curricula.
Lesson Topic 5.8: Organizational Clothing/Equipment Tread Test

Contact Periods: 2.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.8 Perform Organizational Clothing/Equipment Tread Test per Intermediate Swim Curricula.
Lesson Topic 5.9: Survival Confidence and Endurance Swim

Contact Periods: 2.0 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.9 Perform Survival Confidence and Endurance Swim per Intermediate Swim Curricula.
Lesson Topic 5.10: OCS In-Test

Contact Periods: .5 Laboratory

Media: Lecture, demonstration and instruction

Terminal Objective:

Partially supported by this lesson topic:

5.0 Upon completion of this unit of instruction students will successfully complete required performance tests without injury to personnel or damage to equipment.

Enabling Objectives:

Completely supported by this lesson topic:

5.8 Perform Officer Candidate School swim skills assessment as per Navy Swimming and Water Survival Instructor’s Manual Chapter 13.
**COURSE TRAINING TASK LIST (CTTL)**

**NAVY REMEDIAL SWIM TRAINING COURSE**

A-060-2222

**Course Mission Statement**

This course prepares weak or non-swimmers with the basic skills needed to pass or participate in Navy’s 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> Class Swim qualification programs and the basic skills to meet “in test” abilities to begin Officer Candidate School (OCS) swim training and Intermediate Water Survival training. It is additionally used to remediate students who are held back for swim deficiencies from any Navy swim course to include USAF pre-flight students.

ANNEX D
MASTER COURSE SCHEDULE

This annex contains the Master Course Schedule for the Remedial Swim Training Course, which is a flexible guideline for scheduling students. This course is designed for the instructor to target the student's individual swimming deficiencies and to select the appropriate lesson topic(s) which will improve their aquatic skills. Being a self-paced course, not all lesson plans are needed for all students. Students may need additional time to master skills than allotted by the master schedule, or they may be able to master skills much quicker than the allotted time.

Course Title: Remedial Swim Training

Operational Hours: 0730-1600
Length of Period: 50 minutes

ANNEX E

INSTRUCTIONAL MANAGEMENT PLAN

Course Management Data

1. A minimum of two staff are required to conduct the remedial swim course. These two personnel consist of a water survival instructor (9510 NEC or Officer equivalent) and a certified lifeguard. Additional lifeguards must be added to accommodate more than the minimum number of students identified in the lesson plans.
   
   a. Swimming tests will be manned with the number of personnel identified in the lesson plan.

   b. Only a qualified Water Survival instructor or a Training Assistant under supervision of Water Survival instructor, is allowed to coach students in the shallow end of the pool.

   c. When a Basic Swimming and Water Survival instructor under training is teaching laboratory segments of the course, a designated Basic Swimming and Water Survival instructor shall be in close enough proximity to see and hear the training evolution.

2. Facilities Requirements

   a. Classrooms must have temperature controls, adequate lighting for note-taking, and seating capability for 60 students.

   b. Training Pool Requirements:

      (1) Markings: Swimming pools shall be marked in accordance with Section 4-8, Chapter 4, of the Manual Of Naval Preventive Medicine.

      (2) Pool water: Pool water shall be maintained in accordance with Sections 4-9 and 4-11, Chapter 4, of the Manual Of Naval Preventive Medicine. Pool temperature will be maintained at the recreational temperatures of 78-82 degrees Fahrenheit.

      (3) Shower and Restrooms: Shower and restrooms areas will be maintained in accordance with Section 4-8, Chapter 4, of the Manual of Naval Preventive Medicine.

      (4) A well-ventilated space must be provided to store and dry wet training gear.

3. Equipment Requirements:

   a. In addition to the prescribed equipment identified in Annex B the following equipment conditions are required:
(1) Pools must have a fixed or portable audible alarm to signal pool evacuation. A whistle or air horn is sufficient. Students shall be briefed on the signal and what action to take.

(2) A portable emergency medical oxygen system, capable of delivering a continuous flow of oxygen shall be pool side ready for immediate use and shall be inspected prior to each training session. Commanding Officers of training activities will ensure that the oxygen system and Poolside Supplemental Oxygen Training Program is in compliance with the CNET Instruction 1500.20

(3) The following equipment shall be pool side, ready for immediate use and shall be inspected prior to each training session:

(a) U.S. Coast Guard approved ring buoys with manila or polypropylene retrieving lines. Retrieving lines shall be 1/4" diameter and approximately 50 feet in length.

(b) American Red Cross approved rescue tubes, for safety swimmer use. (Torpedo buoys may be substituted).

(c) A fully equipped backboard with head immobilizer and a minimum of three straps for the victim's chest, hips, and thighs.

(d) A first aid kit.

(e) A telephone shall be immediately accessible with emergency numbers posted nearby.

(f) Ear wash (to prevent ear infection) shall be available. An acceptable solution is 2% acetic acid, 3% distilled water and 95% isopropyl alcohol.

(4) Required Personal safety equipment:

(a) Safety Observer: Ring buoy and whistle
(b) Safety Swimmer: Mask, fins, and rescue tube/torpedo buoy
(c) Training Assistant: Ring buoy and whistle
(d) Primary Instructor: Ring buoy and whistle

a. Students must complete all course objectives in order to graduate. Students must receive all lesson plan presentations. If a laboratory application must be cancelled (due to inclement weather, equipment malfunctions, etc.), students must complete the Alternate Training Plan as specified in the lesson plan. The Model Manager may waive certain events if factors (e.g. weather, medical) preclude the students from participating, the course objectives have been met, there is no Alternate Training Plan,
and every effort has been made to complete the evolution. Missed training elements shall be annotated as incomplete in individual training jackets.

b. Equipment delay. If a laboratory must be cancelled and cannot be rescheduled for a long period of time due to facility damage, pool water problems, equipment malfunctions, etc., every effort must be made to reschedule the lab, including the use of other swimming pools or facilities. The Model Manager may waive laboratories if all efforts to reschedule the training have been exhausted. In these situations only the laboratory portion of the lesson plans may be omitted, and the missed training element(s) shall be annotated as incomplete in student's training jacket.

5. Training Safety

a. General

(1) Staff will strictly adhere to safety requirements located in the lesson plans.

(2) In all cases possible, students shall be prevented from pushing themselves to extremis by lending assistance before a rescue is required. Instructional staff shall call a training time out, instruct students to grab a ring buoy etc. before a rescue is required.

(3) Once proper techniques are mastered, timed events can be achieved without extreme physical exertion. Staff shall terminate student participation in timed events and tests if the student's safety is in question, the student needs additional coaching, or he/she is expending too much energy to perform the skill.

(4) Anytime a student shows signs of panic, fear, extreme fatigue or lack of confidence, the instructor shall stop training, identify the problem and make a determination whether or not to continue training. Instructors shall be alert for any unusual behavior which indicates a student is experiencing difficulty and shall act immediately to ensure the student's safety.

(5) Hazing, improper or degrading rituals, or stress producing activities not specified in the lesson plans are strictly prohibited.

(6) Student illness/injury. Anytime a student becomes ill or injured, instructors shall stop the training, and notify the school department head. Instructors shall complete an accident report.
b. Special Safety Precautions

(1) Hyperventilation.

(a) Students participating in underwater activities shall be instructed that hyperventilation (repetitive deep breathing) to achieve underwater swimming endurance can result in shallow water blackout and drowning. Competitive breath holding skills/drills and intentional hyperventilation are prohibited.

(b) All underwater swimming evolutions (testing and training) shall be limited to a maximum distance of 15 yards.

(c) All staff will be alert for and rescue students who appear to be under water longer than is safe during practice or testing of any underwater swimming activity.

(2) During the initial screen test, watch students carefully. Weak swimmers often over-estimate their abilities in desperate attempts to stay with the class. Keep staff alert to watch the deep end carefully.

(3) Do not allow students to swim under the catwalks.

(4) Watch underwater swimming activities carefully to make certain that students don't get disoriented and surface under the catwalks.

6. Safety Management

a. Management procedures will be followed in accordance with CNETINST 1500.20, NavedTRA 135, and OPNAVINST 5100.23 and Command Safety Instructions

b. Emergency Action Plan: All sites shall have a Emergency Action Plan, providing a course of action after a training accident or injury. This Emergency Action Plan will meet the minimum requirements set forth in CNETINST 1500.20 and OPNAV 1500.75 series. The site officer shall be responsible for developing a specific plan. Additionally the Emergency Action Plan must address the following areas and establish procedures integrating the site's unique training capabilities:

(1) Personnel assignments, responsibilities for accidents and injury management, including reporting and documenting mishaps.

(2) Student management during emergencies.

(3) Requesting emergency medical assistance.

(4) Administration of first aid and oxygen.
(5) Emergency equipment operation, location and use.

(6) Transporting victims.

c. DOR and Training Time Out Procedures

(1) Training Time Out and DOR procedures shall be in strict accordance with current CNETINST 1500.20 series.

(2) Site specific Training Time Out Signals:

(a) Crossing the hands in a "T".

(b) Calling "time out", "TTO", "training time out" or "time".

(c) Moving to the side of the pool, during timed tests, constitutes a training time out.

(d) Instructors throwing a ring buoy to a student, or instructing them to stop or move to the side of the pool for additional coaching, or for safety purposes constitutes a training time out.

(e) A designated instructor should be in close enough proximity to see and hear the students at all times during the course of instruction of a high risk training evolution.

7. Records Keeping

a. Class rosters, showing training received, and grades achieved shall be retained for a period of four years.

b. Water Survival Student Screening Forms shall be maintained for 72 hours after completion of training.

c. Injury logs, reports and records shall be attached to a copy of the class roster and retained for five years at the site.

d. Student Critiques shall be routed through the immediate chain of command and retained from site evaluation to site evaluation.

Student Flow Management Data

8. Graduation

Students must complete all course objectives, lesson plans and laboratories to graduate.

9. Remediation

As this course is designed specifically to remediate students, remedial training consists of additional coaching and assistance
as recommended in the lesson plans.

10. Setback to Another Class

Students experiencing a setback in training for emergency, medical, PRB, or other reasons will be returned to training in the first available follow-on class. Remedial Swim course instructors who receive a "rollback" student shall be made aware of the reasons for the rollback.

11. Dropped from Training for Academic or Suitability Reasons.

When a student fails to meet prescribed standards shall be referred to a PRB.

12. General Training Guidelines

   a. Upon check-in, students shall be given either a verbal or printed schedule of events and important administrative information. Welcome aboard packets are encouraged.

   b. Students shall receive all required lectures and audiovisual presentations which relate to in-water labs, prior to applicable in-water training.

   c. After training completion, students shall be given the opportunity to complete a course critique Form.

Instructor Certification Program

13. Staff Training and Certification Requirements:

   a. Instructors, Training Assistants, Safety Swimmers, Safety Observers etc. will be trained and will maintain qualifications specified in NAVEDTRA 135A, and current Job Qualification Requirements (JQR) document.

   b. Required qualifications and training of staff members shall be documented in individual training records.

   c. At least one member of the staff shall maintain necessary instructor qualifications to keep staff current in Lifeguarding, CPR, First Aid and Oxygen administration.
ANNEX F

Stretching Exercises

A. Lead students through the following stretching exercises prior to all in water evolutions.

1. Preparation

   a. Stretch within your limits without straining.

   b. Do not hold your breath while stretching and do not bounce.

   c. There is a difference between the feeling of stretch and pain. When you stretch you should stretch to a point where you are feeling an easy stretch then hold and relax. As you relax and the feeling of the stretch changes to a milder stretch, then stretch a little further until you get the feeling of a good stretch again.

   d. Hold stretches for a minimum of 20 seconds.

2. Types of stretches to perform

   a. **Side to side stretch:**
      Arm straight up and grasp the left wrist with the right hand. Slowly lean to the right without bending forward at the waist. Repeat in the opposite direction.

   b. **Triceps stretch:**
      Touch the left shoulder blade with the left hand and press down on the left elbow with the right hand. Repeat for right arm.

   c. **Posterior shoulder stretch:**
      Stand with feet shoulder with apart. Bring the arm that is to be stretched across the chest. Use the opposite arm to pull the arm being stretched towards the chest until the stretch is felt in the posterior shoulder. Repeat for opposite arm.

   d. **Quadriceps stretch:**
      Standing with left arm on bulkhead for support with right hand reach back and grab right ankle. Then pull ankle up towards buttocks keeping knees together. Repeat for left leg.

   e. **Groin stretch:**
      While sitting with the soles of the feet together and back straight, grasp both feet and pull them as close to the body as possible. Gently pull toes upward, relaxing the musculature of the inner thigh, allowing the weight of the knees to stretch the muscles.
f. **Calf stretch:**

(1) Stand facing the wall approximately four feet away. Lean against the wall, bring the right leg forward while keeping the left leg extended and left heel flat on the deck.

(2) After calf stretch, bend the left knee and shift weight forward to stretch achilles tendon.

(3) Repeat (1) and (2) for the right leg.

(4) Now stretch with both legs extended, heels flat on the deck.
