

PMW 740

International C4I Integration Program Office

Who We Are and What We Do

PMW 740 provides integrated, releasable C4I solutions for international customers in support of U.S. national security and foreign policy objectives. We deliver and integrate products and services for command, control, communications, computers and intelligence (C4I) to U.S. allies and coalition partners. We assist our customers throughout the product lifecycle, including initial requirements analysis, product sustainment and support. The result is enhanced interoperability between the United States and its international partners within cost, schedule and performance objectives.

Capabilities and Products

Our portfolio includes products from other PEO C4I program offices as well as from industry partners.
