Space and Naval Warfare Systems Command Awards Contract

SAN DIEGO — CACI, Inc., Chantilly, Va. (N00039-10-D-0005); Computer Sciences Corp., San Diego (N00039-10-D-0006); G2 Software Systems, Inc.*, San Diego, Calif. (N00039-10-D-0007); Northrop Grumman, Herndon, Va. (N00039-10-D-0008); and Science Applications International Corp., San Diego, Calif. (N00039-10-D-0009), were each awarded on Feb. 11, 2010, an indefinite-delivery/indefinite-quantity multiple award contract for Department of Defense command and control (C2) software development, as well as modification and enhancement of existing C2 systems. Services that may be ordered under these contracts include software design, development, and modification; software integration at the unit- and system-level; related test and evaluation support; software systems engineering support; and support functions including integrated logistics support, configuration and program management support. Each contractor will be awarded a \$5,000 task order at the time of contract award. These contracts include a three-year base period and two one-year award terms, making the potential period of performance five years. The five-year estimated amounts of each of these contracts range from \$493 million to \$648 million. These five contractors may compete for task orders under the terms and conditions of the awarded contracts. Work will be performed in the contractors' facilities and is expected to be completed by January 2015. Contract funds will not expire at the end of the current fiscal year. This requirement was solicited using full and open competition via the Space and Naval Warfare Systems Command e-commerce Web site and the Federal Business Opportunities Web site, with 13 offers received. The Space and Naval Warfare System Command, San Diego, Calif., awarded the contracts on behalf of its organizational partner, the Navy's Program Executive Office for Command, Control, Communication, Computers and Intelligence
